Promise Udekwe

Entrepreneur building the business model for tomorrow's energy suppliers

Paris Area, France

Résumé

I am passionate about the energy sector and seek to bring new solutions and opportunities to the business world of energy

- End to end expertise: from upstream oil & gas to power generation to downstream and trading
- Advanced skills in economics, project valuation and commodity risk management
- Deep knowledge of the European energy market
- Experience in growing new businesses and executing complex deals
- Entrepreneurial mindset combined with strong communication skills

Expérience

Réseau Entreprendre

Member of Réseau Entreprendre Paris

avril 2014 - Present

Région de Paris, France

Réseau Entreprendre Paris is an association of entrepreneurs that supports entrepreneurs with strong potential development and job creation

CSN Energy

Founder & CEO

septembre 2012 - Present

Région de Paris, France

CSN Energy is an Energy Cloud Operator.

We provide a cloud based energy supply management platform and related services that enable private or public companies to play the role of an Energy Supplier in order to enrich their existing service offerings.

WeDeex is our Business Digital Platform dedicated to energy (gas and electricity) transactions management, with trading and balancing capabilities, tariff engine and complete customer care suite.

The system is fully automated, uses smart contracts and becomes a disintermediation platform for peer to peer transactions when connected to a blockchain technology, able to manage self-consumption and renewables with online access to smart energy efficiency solutions.

WeDeex is probably the first fully integrated utility in a box that connects energy producers, prosumers and consumers anywhere in the world.

The most exciting and enriching experience I have ever had!

Visit our website: www.csnenergy.com

GDF SUEZ Exploration & Production

7 ans 9 mois

Commercial Manager

mai 2008 - juin 2012 (4 ans 2 mois)

In charge of the commercial development of the E&P Division of GDF Suez. Active contribution to commercial negotiations with European utilities, International Oil Companies and National Oil Companies in Europe, North Africa and West Africa. Coordination of price reviews on long term gas sales. Worked on many projects of oil & gas fields acquisitions and development (Norway, UK, Caspian region, North Africa, Australia, ...).

In charge of dealing with fiscal issues within the framework of tax reassessments.

Major contribution to the implementation of the Division's Risk Management Policy and hedging strategy.

A very exciting experience where I learnt a lot!

Pricing Manager

novembre 2006 - mai 2008 (1 an 7 mois)

Région de Paris, France

In charge of developing gas & electricity pricing offers to professionals and optimizing hedging process.

Focal point of the business unit for commercial reporting and for the assessment of the team's sales results.

Major contribution to the performance of the business unit.

A very instructive experience which has allowed me to develop the necessary skills to be able to evolve in a business where market finance is omnipresent.

Business Engineer

octobre 2004 - novembre 2006 (2 ans 2 mois)

Energy consultant to blue chip clients in the metals and materials industries. Contributed to develop energy-related services such as plant and equipment process diagnostics, Energy Demand Management (EDM) and other solutions. Conducted energy measurement campaigns in industrial sites.

Very rich experience where I have developed strong technical skills in energy efficiency and knowledge in Energy engineering and Gas and Power technologies.

EDF Nuclear Power production Division

Internal Organisation & Project Management Consultant

septembre 2002 - octobre 2004 (2 ans 2 mois)

In charge of conducting studies and audits in order to help the senior management to make industrial policy decisions.

Supported and advised nuclear site senior managers and senior executives on organising, restructuring and managing industrial projects and nuclear power plants maintenance program.

Very instructive experience which has allowed me to comprehend the industrial stakes of the nuclear industry.

Formation

Ecole des Mines de Douai

Master degree, Energy Engineering · (2000 - 2002)
